GLOVE-SCENTED

PINKS

The flowers are finely double, about one and a half inches across, with the edges of the petals delicately fringed, and come in the most varied colors and shadings including many dark reds, which are entirely new to this type of hardy pinks. The colors range through pure white, with rose centers, light pink, red and salmon, deep pink, red and crimson, heavily bordered or ringed with rich, contrasting colors, and all have the rich spicy clove fragrance of the well known Scotch or old-fashioned "Grass Pinks" of grandmother's gardens. The plants when in full flower measure only twelve inches in height and are literally covered with the profusion of flowers. Pkt. 200 seeds 4c.

The Flower Garden

Nothing helps more to make the home surroundings attractive than a generous use of flowers, and no finer and more beautiful showy color effects need be desired than those which can be made with the old-fashioned flowers, favorites of our grandmothers' gardens; which may with comparatively little expense and care, be raised from good seeds. Their culture is very simple—(With every order you will receive my new book, "SUCCESS WITH FLOWERS") and the results are quick and beautiful, and the cost low. Besides the pleasure to be derived in the cultivation of flowers is only known in its fullest extent by those who have watched every day's mysterious growth, from the tiny seed leaf, to the grand display of the fully developed plant. To be sure, there must come now and again in spite of good seed and careful management, unaccountable failure and disappointment. Experienced gardeners sometimes fail, but try again with the same seed—and succeed; so do not be discouraged by an occasional failure; unfavorable seasons, insect enemies, etc., have to be contended against, these are but the background to success—the little difficulties of attainment which make the eventual success so sweet.

GIANT OSTRICH PLUME ASTER

The Most Beautiful and Perfect of All Asters

This magnificent Aster may be briefly described as being the finest of the Comet type yet introduced, differing in the candelabra form of growth and a greater freedom of bloom, but its greatest merit is in the flowers, which are of immense size; made up of much longer, more loosely formed petals. The whole flower has a distinctly feathery effect, greatly resembling that of the fine Japanese Chrysanthemums, rich, clear, brilliant and exquisite colors, with a perfect form and extra long stems. Without question the most perfect giant flowering Aster known. Pkt., 125 seeds, 8c.

Sample's Branching Aster

The plants form strong, robust bushes about two feet high; bearing profusely on long strong stems handsome double Chrysanthemum like flowers, many being over six inches in diameter. The form of the flowers is beautifully shown in the illustration, and as can be seen have none of the stiffness usual to most Asters, making them particularly desirable as cut flowers.

GERANIUM—Scarlet Bedder

Seed saved especially from an improved large flowering rich scarlet strain particularly adapted for bedding purposes, being dwarf in growth, yet broad and massive, forming a solid bank of bright green foliage, above which the brilliant scarlet flower trusses show with striking effect. The florets are of the largest size, double and semi-double, delicately regular in form, well massed trusses on stiff upright stems, making a constant bright display of bloom the entire summer. I have been trying for several years to secure a strain of Geraniums that could be depended upon to produce a fine double or semi-double scarlet flower direct from the seed, and I am sure it will give satisfactory results. At the same time, I will state, that occasionally it will sport other colors and varieties (but they will be new ones.) If you are a lover of Geraniums be sure and give this strain a trial. Pkt., 30 seeds, 8c.

SALPIGLOSSIS

Giant French

A Beautiful Annual

I want to say a few words in favor of a beautiful half-hardy annual that is not very extensively cultivated, but which would be seen oftener if flower growers knew its real beauty. That flower is the Salpiglossis and it can be grown as easily as Phlox or any other annual. The graceful flowers, borne on long stems, range in color from the most delicate shades of light blue and straw color to the deepest purple and richest brown and maroon. The quaint funnel-shaped flowers somewhat resemble those of the Petunia.

GIANT-
FLOWERING
**SWEET
SULTANS**
OR
GENTAUREA IMPERIALIS

A magnificent strain with flowers exquisitely fringed, delightfully scented, and at least twice the size of the older varieties. The plants are also earlier flowering. The colors are varied from white through shades of red, from pink to crimson and through blues from lilac to purple, some having centers of a different color, as violet with white centre, etc. For bouquets, vases, etc., they are of exceptional value. If not scarcely opened they will last for ten days in water. The plants are of the easiest culture, flowering freely in the garden the first summer from seed sown in the spring. They are of strong, bushy form, 2 to 3 feet high, Pkt., 100 Seeds, 6 cents.
